

HPAI Response

Initial Epidemiological (Epi) Interview

May 28, 2024

Your participation is vital and will help APHIS understand the occurrence and extent of HPAI detections in poultry. APHIS will safeguard study data as Confidential Business Information (CBI), as defined in the U.S. Code of Federal Regulations (CFR) 19 CFR 201.6, and we will utilize exemption 4 for any Freedom of Information Act (FOIA) (5 U.S. Code 552) requests for survey information associated with this study. Response is voluntary and you may discontinue participation at any time.

Instructions

We are asking you to fill out this survey to provide information on daily farm activities, facility and premises practices, deliveries to the premises, and sick poultry. The purpose of this survey is to better understand the health syndrome in poultry and to explore potential risk factors for infections in poultry. Any reports from this study will combine the data from all participants. The results of this survey will be summarized to develop hypotheses and to identify specific topics for future follow-up studies.
